Projects

Project Name 1 | **BANKING MANAGEMENT SYSTEM**

AP

- Developed a Bank Management System utilizing core Java, SQL, and data structures for efficient and secure customer account management. Effectively communicated with team members to understand project requirements.
- Available at: <https://github.com/vivekhari970/BankManagementSystem>.

Project Name 2 | **Faculty Capacity Building and Performance Enhancement Project**

AP

- We propose an innovative software-based approach that guides and motivates teachers to learn and implement new teaching methodology.
- Imagine if our education system provided every teacher with the opportunity to monitor and teach every student effectively. For this we have developed a credit-based mechanism in which every teacher will be awarded points for his/her activities and initiatives.

Project Name 3 | **Community Service Project**

AP

- Led initiative to digitize 40 local shops and Developed a website dedicated to online booking services for vegetable shop using HTML and CSS.
- Available at: <https://vivekhari970.github.io/vamsi/>.
